RE: SQF Level II Recertification

Dear Valued Customer,

We are pleased to announce that our manufacturing facilities located in York, Pennsylvania have successfully completed the recertification process for SQF Level II certification on 5/28/15. We have attached a copy of our certification letter for your records.

C-P Flexible Packaging is committed to providing its customers with safe quality products that are manufactured in compliance with regulatory requirements and approved industry codes of practice.

C-P Flexible Packaging has maintained a Level II Certification with the Safe Quality Food Institute (SQFI) since July of 2013.

SQF Certification is recognized by the Global Food Safety Initiative (GFSI) and links primary production certification to food manufacturing, distribution and agent/broker management certification. Administered by the Food Marketing Institute (FMI), SQF benefits from continual retailer feedback about consumer concerns. These benefits are passed on to SQF certified suppliers, keeping them a step ahead of their competitors.

We appreciate your business and will continue to take significant action to maintain your confidence and trust in our services.

Sincerely,

Joshua Straley
Product Safety & Quality Coordinator
